

Sunbless on Pathways

Mangeshi village, Mardol, Goa
Shree Mangesh Temple
2 December, 2019

Application : SunBless coating over walkway/pavement

Requirement : Surface Temperature reduction on stone blocks and Pavement

Brief : Client requirement was to reduce surface temperature of pavement/ walkway in temple complex which get extremely hot as they are exposed to direct sunlight thereby causing immense discomfort to devotees. This was a trial job awarded to us as a case study for surface temperature reduction on pavement of different material.

Challenge : No paint is possible over china mosaic tiles, paver blocks and granite stone. We executed SunBless coating over the surface in as it is condition.

Results : Surface temperature drop upto 40%.
Temperature drop achieved here is of 15 degrees.
Improved comfort and health.

Withstood CYCLONE TAUKTAE of May, 2021.
